Description

would like to be able to use the leapers with the group. Right now when I leap on the main toon, the rest of the group starts following, then stands there. If i hit the jump button, it is just a quick press of the button. perhaps press/hold with reorientation in mid air for autofollow or something similar?

History

#1 - 2017-01-11 11:26 AM - Amadeus

- Project changed from ISXEQ2 to OgreBot

- Category deleted (Miscellaneous)
