Can you confirm that this was working until recently? If so, do you know when it stopped working?   Or, are you using this feature for the first time and reporting it broken?

Not sure sorry, this is the first time I have tried to use it. I asked CyberTech on IRC a few months ago and he said he would look into it, but I think more important issues took priority.

I don't think it's even been used since CyberTech was using it for insurance fraud.
