<b>Description</b>			
Can we have the ability to do millisecond time delays? Currently, the smallest amount of time to do is 1 second, I would like to be able to do a half second (ex. 500 milliseconds). The one second time delay seems to take longer than I would like on movements :-)

- Status changed from New to Implemented

This will be possible with Quest Bot Version 3.00+. Time Waits can now be performed in milliseconds.
