Description	
<p>When casting Templar's Divine Arbitration, 58 level spell, it spams errors. The spell is supposed to divide health evenly amongst group members. When setting it up as a Heal on the tank at 20% in the cast order, Orgebot spams "CastStack -> CastHeals -> Unknown -> Divine Arbitration -> Tankname". I can cast it manually on the tank no problem.</p>	
Thanks!

Casting -> Ability: Divine Arbitration ID: 1964904386 -- With :Use -- called from: Cast Stack: Heals->ST

Just confirmed it works.
