<b>Description</b>	
<p>Hi,</p> <p>With the new EVE update Cicardian Sleeper are Spawning in regular Belts and Fighting back.</p> <p>After SB shoots and kills the first 5 Seeker 5 new ones warp in. And the new ones have adaptet to your Damage. You will do 1-5 DMG to them and SB will shot them for hours.</p> <p>If you warp to another Belt the will follow you until they are Dead.</p> <p>Thats why you cant use SB for Beltrating anymore:(</p> <p>I Hope you find an sulation fpr this :( Mayby a "do not Kill list" ore something.</p> <p>Thanks</p>

Edit: Cicardian Sleeper do not spawn in every system i think, only in them wit a "unidentified Structer" in system.
