Description	
<pre>Me:GetHangarShips[MyCargo] echo "Hangar contains \${MyCargo.Used} Items" MyCargo:GetIterator[CargoIterator] if \${CargoIterator:First(exists)} { do { xname:Set[\${CargoIterator.Value.Name}] echo Item: \${xname} } }</pre>	
Using Me:GetHangarItems[MyCargo] Items give: Item: Tengu Electronics - Emergent Locus Analyzer	
Using Me:GetHangarShips[MyCargo] However ships give: Item: UnknownLocation(1017427470887)	
Might be a simple fix to get the item name correctly?.
