

StealthBot - Bug #1379

Not Utilizing Miasmos Ore Hold

Description ISXEVE returns true for GetOreHold but StealthBot still does not make use of the Ore Hold on the Miasmos when using Hauler or Freighter modes. This would be a HUGE improvement as it will cut cargo travel times in half for Freighter mode and halve the necessary trips to dock and unload while mining, as well as be able to fully utilize the space in a jet can if you choose to mine that way.
