Description	
<p>For some toons on the same computer, BJ movement group roles does not show up on Ogre UI while others do.</p> <p>The group I am running now is as follows with what works:</p> <p>SK - no</p> <p>Fury - no</p> <p>Mystic - no</p> <p>Wizard - yes</p> <p>Troub - yes</p> <p>illy - no</p> <p>I've seen this on other toons on my other computers. Since they are all using the same Ogre XML, I am thinking there might be something else I didn't refresh. Is this a bug or is there something I am missing. Thoughts?</p>

Restarting BJ Movement usually fixes that issue I believe. You may need to end it first then restart it. (BJ End Movement; BJ Movement)
