| Description | |
| <p>There seems to be a few bugs with crafting writs at the moment, when i craft a level 24 writ on my jeweller requiring 6 seperate recipes the bot will add all 6 recipes to the queue window but will only craft 5 of them before trying to hand the writ in, this also happened on the lvl 20 writs using 2 recipes with 3 combines each.</p> <p>I have checked the writs file in my ogre craft folder and the numbers are set correctly 3,3 for lvl 20 and 1,1,1,1,1,1 for lvl 24 so not really sure what else to check.</p> <p>Also when trying to do writs with my carpenter i set the writ count at 10 and start the bot and she completes 1 writ sucessfully before the bot then stops thinking its done all 10, this happens no matter what i set the writ count at.</p> <p>Both these characters are on the tle server.</p> | |

Test on live. I don't have any toons/resources on TLE. So I need to know if it's specific to there or not.

Also, I need the a log of the console messages, as they will give information about why a recipe didn't work/happen, and why the writs stopped before completing all of them.
