Description

As stated client crash when trying to load ext isxri, just to add to the confusion it crashes on two boxes and works on two! :)

The only thing loaded is isxeq2 so it shouldnt have any issues with ogre or bjscrips dll's.. Not sure if you can see anything that points in any direction. Right now I'm thinking of a full reinstallation of Windows and Innerspace.. But if it can be avoided it would be great:)
