EVEBot - Bug #1594

User Configs Not Saving/ Loading

2016-04-15 01:10 AM - Nerumph

Status:	Rejected

Description

So I don't know what it is about each userconfig, but regardless of what I do under the config.xml, it seems the bots will not load the configs that I had set for each user... At least, it won't load certain settings.

So far, most of the mining, fleeing, combat and fleet settings seem to never load properly. I don't know if this is a proper issue with the XML files or the bot itself but regardless, it does get annoying to have to set multiple bot's setting windows every time I want to load up the programs.

Figured this out out; you need to restart the bots without closing the EVE window for the settings to stick.

Can close this... or whatever it is you do to resolve...
