<b>Description</b>	
<p>I believe this one should be a straight forward implementation into the behaviors of most scripts. Basically, the bots would auto-align (and stop if it were the miner, transport or Orca) and prepare themselves in-case un-desirables or gankers show up on grid or in local.</p> <p>This would especially help with larger ships such as Hulks or again, Orcas, as it would allow them to cut valuable align time from their E-warpout routine.</p>
