

ISXEQ2 - Bug #1629

ContainerWindow - Invalid Results and CTD

2016-06-17 02:11 PM - uiyice

Status:	Implemented
Priority:	Normal
Assignee:	Amadeus
Category:	Broken Feature(s)
Target version:	
vbulletin_issue_id:	
Description	
ISXEQ2 Version: 20160614.0001	
<code>\${ContainerWindow}</code> / containerwindow returns invalid results, and if touched while in a foul mood will CTD.	
With container window open:	
<code>echo \${ContainerWindow.NumItems} -> -256</code> (yes, that's negative 256)	
<code>echo \${ContainerWindow.NumItems} -> 0</code> (now it's 0, and I didn't touch anything, just back to back queries)	
Touching <code>\${ContainerWindow.Item[1]}</code> when NumItems is reading -256 will CTD. When it reads 0, it will return null.
