Description	
<p>My carpenter is doing a writ, which needs to make Halasian Bearskin Rug (40). The Device listed is "Sewing Table & Mannequin" which ogre craft cannot find. I know its not a mapping issue, its in a big room, with just crafting stations in a nice circle.</p> <p>The actual device I am trying to use is the "Guild Crafting Station: Loom". I've been able to craft the recipe there by hand.</p>	

History

Ogre craft also doesn't appear to recognize the special forge used by one of the repeatable ToT crafting quests. I think the quest is http://eq2.wikia.com/wiki/Arming_Maldura

I am not sure on the exact name of the forge, but it might be "Forge of Brell". Next time I run the quest, I'll try to update it.

OgreCraft 1.40 should fix this.

If not copy/paste exact error message from console.

#3 - 2016-08-14 12:17 PM - ClassicCoke

Dev fix worked, it found the correct guildhall crafting table.

Also I believe I ran through all the ToT daily crafting quests and didn't find the recipe that required the "Forge of Brell". If I ever run into it again, I'll post a new bug
