Description			
Would like the ability to delete all daily/weekly missions on all toons. I've had it happen on several occasions where I don't finish everything from the day before or whatever. I want to pick up a new round of quests because I can't get through what's left or whatever before they expire. I have to delete them all by hand, it's just super tedious.

- Tracker changed from Bug to Feature - New

- Category deleted (Miscellaneous)

#3 - 2016-08-07 05:50 PM - Kannkor

- Status changed from New to Implemented

In Ogrebot 17.103g

MCP -DeleteQuest <ForWho> <QuestName>

-ShareQuest and -ShareMission added also

** Added -ShareMission and -ShareQuest.

*** Both take 2 parameters:

*** Parameter 1: ForWho. If all, will be groupleader.

*** Parameter 2: Quest name. At this time because OgreConsole removes comma's, any quest with a comma in it, won't work.

*** The difference between ShareMission and ShareQuest, is ShareMission will ONLY share a quest that is labeled a mission. (I needed this inside of Ogrebot, so figured why not add it to the API). ShareQuest will try to share any quest you give it. ShareMission will also only share if everyone is in the zone and "nearby". ShareQuest just simply shares it.

** Added -ShareMission_InputWindow and -ShareQuest_InputWindow.

*** Same as above just uses InputWindow.
