<b>Description</b>	
If you call SpewStat with a bad argument, it crashes ogre.	
I believe I tried "Reuse"	

#### History

- Status changed from New to In Progress

It would have been when you issued an invalid 3rd argument. Reuse is actually fine.

IE: lc me -spewstats all reuse

Works fine.

The last parameter (which I left blank), is where to send the information too. It has to be a valid innerspace command. In this scenario, the 3 acceptable ones, are oc (ogreconsole, which is the default if left blank), irc (for OgreIRC), or echo (for the regular console).

I can likely make this dump out of thread so it won't crash just give errors.

##### #2 - 2016-08-15 02:58 PM - Kannkor

- Status changed from In Progress to Resolved

With OgreBot 17.105

Added a check to ensure where to send the information to is a valid innerspace command.

```
17:56:25: lc -spewstats all deity IAmNoob
```

```
17:56:25: ToonName-> Tried to execute a SpewStat to *IAmNoob* which is not a valid innerspace command.
```

##### #3 - 2016-08-15 02:59 PM - Kannkor

Also took it out of Ogrebot's main thread, so if some how you do manage to still crash it, it won't crash Ogrebot.
