### Description

It would be nice to have a text export button which will export as text the Pre, Post, and cast stacks for a toon.  Having it export by adding it to the clipboard, a file on disk, or pop open notepad would be great.

I envision the actual text exported to be what is the in the scrollable window for each tab.  Something along the lines of ( stealing from the help, so I am not sure this is up to date text )

PRE

Defensive Minded | On = Experienced Insight

POST

CAST STACK

Unyielding Will | % = 20 | Type = Heal

Last Man Standing | % = 25 | Type = Heal

Perfect Counter | % = 40 | Type = Heal

Draconic Shout | % = 45 | Type = Heal

Hunker Down VII | Target = @Me | Type = Combat

Battle Cry VII | Target = @Me | Type = Combat

Armored VIII | Type = Buff

Summon: The Tribunal's Baliff | Type = Buff
