

ISXEQ2 - Bug #1732

Broker results not returning proper price

2016-12-01 03:07 PM - omgbot

Status:	Closed
Priority:	Normal
Assignee:	Amadeus

Description	
I have noticed that when I search for an item and the first two (or three) items are 1995p and 2000p, <code>#{Vendor.Broker[1].Price}</code> and <code>#{Vendor.Broker[2].Price}</code> will both be 20000000.000000, not 19950000.000000 and 20000000.000000 as they appear on the list. If I'm searching for an item with a lower price (say 1495p and 1500p), it works as expected.

It's hard to follow what you're saying exactly. Can you give me, line-by-line, the exact commands you're putting in the console to see the bugs?

If it's a script, then I need to see the part of the script that's showing the bogus information.
