

Quest Bot 3.00 BETA - Bug #1876

Loop set to "1" does not do the whole queue file

Description		
<p>I have a queue file with first a navigation in load_forced and 8 subsequent quests in load_TS. I want to do the stack of quests but only once (they are weekly quests). If I set the loop limit to "1" it does the first one (the navigation) but not the other quests, QB just stop after doing the first one (the navigation).</p> <p>I need to set the loop at "2" to have it work. I think this is a bug.</p>
