Description

eq2listbox and :GetOptions Crashes eq2

To replicate do the following on any toon

1. open the ZoneReuse window (/togglezonereuse)

2. go to the Proving Grounds Page see below (only thing its useful for =P)

 Zonereuse.png
3. use https://forge.isxgames.com/projects/isxeq2/knowledgebase/articles/11 script for a fast test (Replace the EQ2UIPage within the script) see below

(
EQ2UIPage[_HUD,zonereuse].Child[page,_HUD.zonereuse].Child[Page,2].Child[Page,1].Child[Page,3].Child[Page,2].Child[Listbox,3])

or (EQ2UIPage[_HUD,zonereuse].Child[listbox,_HUD.ZoneReuse.MainPage.TabPages.ProvingGroundsPage.ListPage.PGListbox])

or (EQ2UIPage[_HUD,zonereuse].Child[page,_HUD.zonereuse].Child[2].Child[1].Child[3].Child[2].Child[3])

choose you poison lol

4. hopefully you can fix it

if you need anything more PM me or update this...

History

#1 - 2017-12-19 06:57 AM - Pork

This is now working with no crash so can be deleted...

Thank you
