Target version:				
vbulletin_issue_id:				

Description

Advantages:
- Helps drone based multiboxing setups
- Able to assign to a ship with higher scan resolution
- Only need to lock the target on a single ship instead of multiple ships locking at once

History

If you're asking for a new feature for ISXEVE, then I would like for you to explain exactly how you would do what you're requesting in the game.
Also, a short example of how you might imagine I would impliment the request (i.e., suggestions on datatype/TLO names/members/methods, etc.)

- File Assigning drones.png added

- File picture110-1.png added

Assigning drones is done by:
1. Right clicking a drone or a drone group
2. Navigating to the "Assist" dropdown option
3. Left clicking the Character you wish to assign the drones to

attached image of menu
If the fleet is large (>20) folders of size 20 break up the character list

Implementation:
Fleet:
AssignDroneTo(int64 droneID, int64 fleetmemberID) //Assign single drone to fleet member with ID
AssignDroneTo(activedrone drone, fleetmember member) //Assign activedrone to fleetmember
AssignDronesTo(int64 fleetmemberID) //Assign all drones to fleet member with ID
AssignDronesTo(fleetmember member) //Assign all drones to fleetmember

ActiveDrone:
AssignTo(int64 fleetmemberID) //Assign activedrone to fleet member with ID
AssignTo(fleetmember member) //Assign activedrone to fleetmember

Update: "Istype eve" returns the following methods:
- DronesAssist
- DronesGuard

This methods signatures should be added to the wiki.
Consider this feature request closed.
