Description	
<p>Hello Kannkor,</p> <p>I have a Chat Event that trigger this code :</p> <pre>oc !c -CastAbility ToonName "Tunare's Watch"</pre> <p>which is exactly what is in Ogre Console when using a MCP button to do it</p> <p>When I save this Event I get in the Code part :</p> <pre>Code = "oc !c -CastAbility TooName Tunare's Watch"</pre> <p>notice the double quote at the end and no quote before Tunare</p> <p>When triggered I see in ogre console :</p> <pre>!c -CastAbility ToonName Tunare's Watch"</pre> <p>which does not obviously work</p> <p>Thank you for your help</p>
