

ISXEVE - Bug #2108

ISXEVE.IsSafe() broken

2018-11-27 04:00 AM - shingles

Description	
Hello,	
It seems ISXEVE.IsSafe() is broken. Usually when undocking and i have a session timer it evaluates to false however it evaluates to true all the time even when i have a session timer. This leads to my bot trying to do actions that can not be done when isxeve is not ready.	
I'm using a .NET Script and getting a list of systemAnomalies/active drones when i'm undocking tends to break the bot due to this bug.
