Description

This item can be added (in this case, as an agent to overseer, but not sure how important that is).

If I double click it, it will try to add it to my collection.

I tried to use :Unpack, :Consume, :Use, and about every other option available to items and none of them would duplicate the Add to Collection.

Thought I'd try to use the radial menu if I could right click the item, but wasn't able too.
