Description			
The broker window search results are missing the seller's name. If you could find it, that would be great!

Unfortunately I have never been able to figure out how to get this information, at least not without pulling it directly from the Window itself, which wouldn't be in alignment with how the rest of the market/consignment stuff is done (and even then, I'm not sure if it would work.) For some reason, the way they did this was very unusual and I'm just not sure I can easily produce this information.

Basically, I'm afraid that the cost-benefit analysis of spending more time on finding this information isn't worth the benefit that it would provide to users. I'm sure it would be useful, but it's just not vital, at least not in such a way that is worth more time digging around to figure it out.
