ISXEVE - Bug #2218

Directional Scanning Not Performing

2022-09-17 07:09 AM - Elusif

Status:	New	
Priority:	Normal

Description

The directional scanner script provided as an example on how to use it does not seem to work anymore. It worked a few weeks ago though.
When the DScan window is docked to the solar system window the script doesn't run (probably doesn't see the window become active or something).
When the DScan window is undocked (separated) from the solar system window the script does run but it pulls back nothing but NULLs.

To recreate : Be in ship in space, run your dscan test example script thing, observe it not working as expected.
