<b>Description</b> The ore compression window can be opened from space at any time, you have to right click on any uncompressed ore, and then click compress. That will open the Compression window. The reason to be able to open this window is important is once the window is open, we can have the bots check if the compress button is available, and if it is they can press it and compress the ore in their cargo hold on their own. This would allow someone to be in a fleet with a booster running compression allowing them to not need to dock to drop off ore or without having to jetcan. unknown.png unknown.png	

#### History

##### #1 - 2022-09-24 06:20 PM - jsmb768ypl

Be in space  
Have ore in ship inventory  
Right click the ore  
Compress option is present in the menu  
This will open a compression window.

The reason to be able to open this window is important is once the window is open, we can have the bots check if the compress button is available, and if it is they can press it and compress the ore in their cargo hold on their own. This would allow someone to be in a fleet with a booster running compression allowing them to not need to dock to drop off ore or without having to jetcan.

This has been fixed and now works as expected.
