Description	
I'm looking for an addition to the EQ2 TLO that will list the account features that are available.	
There is an in-game command to see which expansions/packs have been purchased on an account: /show_account_features	
	
If this information could be made available somewhere so that I could check to see, for example, if The Fallen Dynasty pack was available that would be great!

* Added new METHOD to the 'eq2' datatype:

1. GetAccountFeatures[index:string] (This method requires that you be loaded into the game as an active character.)

See <https://forge.isxgames.com/projects/isxeq2/knowledgebase/articles/75> for an example script that displays all account features, searching for a specific account feature, etc.
