Description

Open Fitting Window (alt+f)

0: click on Toolbar Image called Browser

1: Different Filters. These include: Personal fittings, Corporation fittings, Community fittings, Current Hull, Skills

2: A list of all the saved fittings for set filter. Button in front of the name of the saved fitting indicates the source (Personal fittings, Corporation fittings, Community fittings). Click on a name to choose the fit

3: Then the button "Fit Ship" appears (if you iterate over the buttons of the FittingWnd its not yet visible).

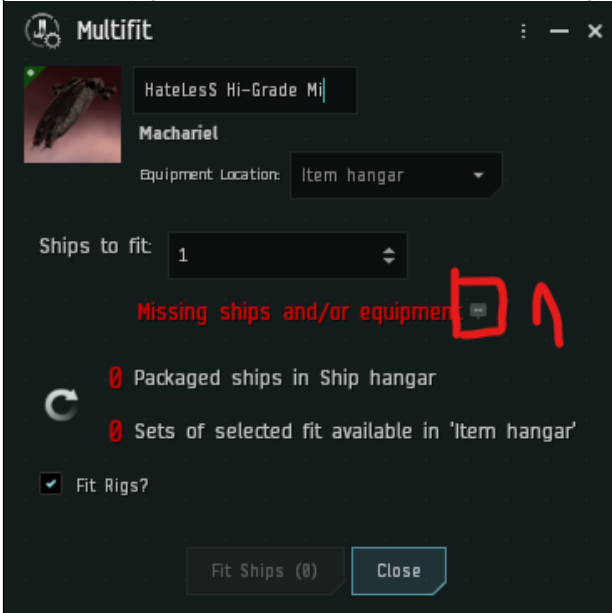

Click on it to automatically fit

if in the same hull, rigs are the same and you have all the needed modules in itemhangar or already on your ship, then it will just fit the ship

this is what I'd like to have and request.

Optional:

if that fails (eg different hull, some modules are missing) then it will open another window "Multifit"

If you have the needed ships and equipment, but are not in the right hull, then you can fit your ship here and activate the ship via GetHangarShips

If something is missing you can hover over the red marked "1"

and press on "Buy All"

Which will open the multibuy window

Buy Items (18) - Jita IV - Moon 4 - Caldari Navy Assembly Plant

Drop item types to add to buy order
