| NEW   |  |
| <ol style="list-style-type: none"><li>1. <a href="#">Amadeus</a> I don't know if this is a new bug or if it broke from this, but I can't get an evefittingwindow object. Not sure if it's cause the fitting window name changed (fittingWnd). The changelog says you're supposed to use EVEWindow[Fitting] to get an evefittingwindow object, but that just returns NULL when the fitting window is up. Wondering if it's as simple as changing things to return an evefittingwindow object from EVEWindow[fittingWnd].</li><li>2. Might be more broken with fitting under the hood, but I can't test any of the evefittingwindow functionality since I can't get an object</li></ol> |  |
