Description	
<p>Jump currently works on stargates, but it also needs to be usable on Ansiblex Jump Gates. Their group is "Upwell Jump Gate", with GroupID 1408.</p>	
<p>In addition, the fleetmember type needs a method matching the "Jump to Member" menu item, for using a jump drive to jump to that member's cyno. If possible, it'd be good to get a method for the associated "Bridge To" menu item as well.</p>
