Description	
<p>Information about the size/scale of an actor.</p> <p>For example, when an actor shrinks or gets bigger, we need that value.</p> <p>(It's being used in various fights this expansion).</p> <p>There's a few ways of testing this.</p> <p>1) On a class with a pet, such as Illusionist, cast your pet. Then use the ability "Shrink Servant". This will change the size of your pet, however no actor members change. (Literally, no values in any actor information we have change at all, with the exception in this case, the pet gets a buff from it).</p> <p>2) At a Loyalty Merchant in any major city (East Freeport, some where in Qeynos), you can buy a "Mystic Moppet Billy" doll for 5 tokens. This will shrink yourself. Same, no actor details change when using/canceling this. If you need /locs of where to buy this in a city I can get them for you.</p>
