

## ISXEQ2 - Bug #1218

### Craft Opening w/ Transparent Background

2014-10-13 04:45 AM - Herculezz

<b>Status:</b>	Resolved

<b>Description</b>	
This was brought up on IRC and i was able to replicate it so I figured i would post. If you open craft and click the craft lite button and then close craft, when you reopen it you are back to full craft but with a transparent background and nothing is clickable, (seemingly the ui windows Height value is staying the value for craft lite) and nothing i have found will get it back.

- Priority changed from Normal to Low

I would suggest avoiding the 'craft lite' feature of the built-in craft. The embedded craft script is no longer actively being developed and is just on maintenance mode as it stands right now.

I mean, I could remove the 'craft lite' entirely to avoid the bug. But, I doubt if that would be preferable. My suggestion is simply to avoid using it. (Frankly, I never found a reason to use it in the years that I used craft with multiple characters.)

Removing Craft Lite altogether would be great, because once you do what i mentioned above you can never get it back it is stuck transparent like that forever, even after client reloads, innerspace reloads, and even pc reloads, you can never get back to using craft again unless you do a complete reinstall of isx (only method i have found to revert it)

With the window open, try "run uireset"

I can't remember if it only resets the position, or does a full reset of the UI (which I think it does).

##### #4 - 2014-10-13 03:11 PM - Herculezz

That did work kannkor, Until someone can get that little craft lite buggger removed maybe a post on the forums about the uireset will help people. I'll try if i get time later this evening.

##### #5 - 2014-10-13 11:41 PM - Amadeus

I'm going to add uireset.iss to the ISXEQ2 distribution if it's not already.
