

StealthBot - Bug #1231

Miner mines nearby rocks for extremely short periods of time before bounce-warping

2014-10-15 01:48 PM - Stealthy

<div>Status:New</div> <div>Priority:Normal</div> <div>Assignee:</div> <div>Category:</div> <div>Target version:</div> <div>vbulletin_issue_id:</div>	
<div>Description</div> <div>If I'm on a given high-priority rock, and the next best rock after this one is on the other side of the belt, when I end up popping the rock I'm on I will then swap to crystals for whatever other rocks are nearby and harvest them for a fraction of a cycle, wasting capacitor, wasting crystal durability, and looking blatantly like a bot.</div>
