Description	
I have the following error with the inventory Price match function.	
It is pricing the items in the "Legend's Display Case" Capacity 30, broker fee reduction says 25%.	
The script will unlist everything for sale there and then not relist them due to the error shown below.	
Item Number: 18 of 19 ItemName: wind elemental core MyBrokerItemPrice: 380000.000000 // MyBrokerItemMerchantValue: 0.070000 17:15:35: Unlisting wind elemental core in order to price match. BrokerItemBasePrice: 437500.000000 // BrokerItemCommisionPrice: 481250.000000 // BrokerItemCommisionFee: 10.00% 17:15:36: ERROR: My Broker Commission Fee is 15%. This number should not be possible. Report this error to bjcasey.

In Patch # 110 I have added an additional debug message to help me narrow down why this is happening. Look for the following message in your console:

```
ERROR[#]: Broker Commission Fee is ...
```

I need to know the value of the #.

Also, when you are selling something from that box and you click on the item in the broker search window, what does it say for the Commission % is?

Example: I have a Veteran Display case with ItemX. I set the price and then search for it. I click on the item in the search results and at the button of my broker window it shows that: "Commision is 10% for markets."
