| Description | | | |
| <p>Much like the Mezz tab and the auto target tab i would like to see a tab that will enable the user to add spells that should always be inturrupted and what spells or items to do the inturrupting</p> <p>as an added bonus and not really necessary i would like to have lists that can be saved for certain zones but i dont know how much use that will give for right now just the ability to have a list of spells to be interrupted would be amazing.</p> | | | |
