Target version:				
vbulletin_issue_id:				

Description

Enable Propulsion Modules (Microwarpdrives and Afterburners) if we're out of optimal range and only if there s at least x % Cap available. Also add an option for always on, since some fittings require Speed Tanking.

History

#1 - 2015-10-16 08:16 AM - bjcasey

- Status changed from New to Implemented

Available with Patch # 5.
