

BJScripts - Bug #1493

Not approaching rats

2015-10-20 06:30 PM - pz

Status:	Resolved
Priority:	Normal
Assignee:	
Category:	
Target version:	
vbulletin_issue_id:	

Description

After clearing several rats, I'm now drifting in space as Astro lets me know that the rest of the rats are out of range;

21:26:07: Skipping Locking Target_1 -- Target was not assigned.
21:26:07: Skipping Locking Target_2 -- Target was not assigned.
21:26:07: Skipping Locking Target_3 -- Target distance is greater than my target range [262059.057575 > 66125.000000].

Also note it's only mentioning Target1-3 though I have 5 targets configured.

There are a couple rats much closer than that (though still out of range) that it's completely ignoring.
