Description	
Crashing Issue	
I am running 64 bit windows 10 Ogre ISBoxer and ISXBJ	
When I type bj LM in the console one of my 6 toon windows that are open will crash.	
If I have one window or 6 windows open and type BJ LM the single window or one of the 6 will crash with the error message below.	
Steps to reproduce: type BJ LM in console. If this is the first time using it on the PC it will work. If you quit game and come back into EQ2 the 2nd time will always crash, it does not matter if you reboot, shut down isx completely anything the 2nd time will always crash it's like it stores "this is your second time launching" so i will crash on you.	
When you bring EQ2 back up it will launch on the 3rd try. So in short	
1st use works 2nd use crashes 3rd use works 4th use crashes	
Both BJCasey and Innerspace said it is a bug with ISXSQLite.
