<b>Description</b> <a href="http://pastebin.com/3Cit3ckY">http://pastebin.com/3Cit3ckY</a>  \${ExamineItemWindow.Toltem.DamageType} seems to be crashing. Examine any item and then echo that to console.  I also received this error message a couple of times, but am not sure if it's related or not: Error:Object 'item' member 'DamageType' returned TRUE but gave no object type @\${ExamineItemWindow.Toltem.DamageType.NotEqual[NULL]}	

#### History

- Status changed from New to Closed

I just removed item.DamageType entirely since it seems that it's not very useful and is more trouble than worth to maintain.
