Description		
<p>I found that Undead Horde on the Necro was not casting.</p> <p>Its seems to be classed as an Encounter spell and not a single mob spell .</p> <p>I Had it set under Named CA casting and my Encounter smart nuke was enabled. I set the spell to Ignore Enounter Nukes and now noticed it was casting under CA and Named CA no matter what the mob was.</p> <p>Just noticed in the Debug info for casting , that Awaken Grave is also being cast under Named CA i was fighting a normal 2 encounter mob.</p> <p>This could be mob type detection Bug.</p>
