Description

Add a command for QB that will harvest anything that can be harvested in the distance of XX with collision detection as usual

I am doing the Maldura Weekly TS quests and for replenishing the stock my qb file is just a big go there harvest that, harvest this, etc

It will be simplier to just harvest all including collecting shinies

- Status changed from New to Duplicate

This will be possible when Ogre Harvest support is added. http://forge.isxgames.com/issues/1812
