Description

Script Snippet: https://pastebin.com/Shx40XYX

I'm trying to determine how far away an anom is from my current position. Anything .ToEntity is returning NULL.

To reproduce, go to any system with a cosmic anomaly present (check your probe scanner) and run the script snippet from above.

History

Can this be looked into? Belt ratting is dead over 5/6 years ago and there's no way for me to develop a ratting bot.
