Description

When transferring to a fleet hangar that does not belong to you, it can get itself into a loop of not transferring an item because it's too large for the remaining space and the fleet hangar owner not warping back to station because their current hangar capacity is below their full threshold.

Maybe have the person transferring items send a return to station command if they fail to transfer an item due to size.

History

#1 - 2017-07-04 09:02 AM - bjcasey

- Status changed from New to In Progress

#2 - 2017-07-06 05:50 AM - bjcasey

- Status changed from In Progress to Implemented

This has been implemented in [Version 1.011](#)

I did not feel that telling another ship to return to station was the best solution to this problem.
