

AstroBot - Bug #1970

Approaching From Multiple Functions

2017-08-06 09:09 AM - bjcasey

Status: New	
Priority: Normal	
Assignee:	
Category:	
Target version:	
vbulletin_issue_id:	
Description	
<p>If AstroBot is required to approach a target and the approach function is called from multiple sources (ie. main script and module script), it will bug out waiting for approach, but not be moving at all.</p>	
<p>Fix: Add a check to the call for approach. If it is already approaching a target, skip it.</p>	
<p>Fix 2: Add a check to the wait for approach, that if you aren't approaching, it attempts to approach the target.</p>	

History

Hauler is forgetting that it's inventory is full when it is approaching when the condition is met. This leaves it in a stuck state where it does not warp to station.
