EVEBot - Bug #2161

Orca going to warp when leaving station

2020-11-29 12:05 AM - saridd

Status:	New
Priority:	Low
Assignee:	CyberTech

Description

When the orca leaves the station for the first time after the script has been run, it won't jump into warp. It travels at full speed until user intervention, whereby if I stop the ship the bot then immediatley takes it into warp and away it goes.
