

ISXEQ2 - Bug #2202

effectinfo.EffectString and effectinfo.NumEffectStrings not working correctly

2022-02-14 03:27 AM - Kranok

Status:	Resolved
Priority:	Normal
Assignee:	Amadeus

Description	
ISXEQ2 v20220210.0001	
Seems to be any effect (Beneficial or Detrimental). I'll use "Membership Benefit" as an example:	
echo \${Me.Effect[Query, MainIconID == 955].IsEffectInfoAvailable}	
FALSE	
echo \${Me.Effect[Query, MainIconID == 955].IsEffectInfoAvailable}	
TRUE	
echo "\${Me.Effect[Query, MainIconID == 955].ToEffectInfo.Name} - \${Me.Effect[Query, MainIconID == 955].ToEffectInfo.Description} - \${Me.Effect[Query, MainIconID == 955].ToEffectInfo.NumEffectStrings}"	
Membership Benefits - - 327680	
echo "\${Me.Effect[Query, MainIconID == 955].ToEffectInfo.EffectString[1]}"	
hangs	
The empty string for "Description" is correct and seems to work correctly for other buffs/detriments. Here, NumEffectStrings is 327680, or (0x50000). The actual number should be 5. However, even if you already know that, accessing one either gives random data, or hangs the client.

I believe that it should be fixed in version 20220210.0002.

Confirmed, thanks Amadeus. Works correctly in the updated version.
