

## ISXEQ2 - Accessing and iterating journal quests

To use this test script, create a file in your /innerspace/scripts folder called Quests.iss and place the entire text below. Then, you can run the script by typing the following command in the InnerSpace console (while in the game): run Quests. (*Note: An active journal window may be required for this to work.*)

```
function main()
{
    variable index:quest Quests
    variable iterator It
    variable int NumQuests
    variable int Counter = 1

    ;;;;;;;;;;;;;;
    ;; Active Quests
    NumQuests:Set[${QuestJournalWindow.NumActiveQuests}]

    if (${NumQuests} < 1)
    {
        echo "No active quests found."
        return
    }

    echo "Your character currently has ${NumQuests} active quests."

    QuestJournalWindow:GetActiveQuests[Quests]
    Quests:GetIterator[It]
    if ${It:First(exists)}
    {
        do
        {
            echo "-----"
            echo "- [${Counter}] ${It.Value.Name}"
            echo "-- ID: ${It.Value.ID}"
            echo "-- Level: ${It.Value.Level}"
            echo "-- Category: ${It.Value.Category}"
            echo "-- Current Zone: ${It.Value.CurrentZone}"
            Counter:Inc
        }
        while ${It:Next(exists)}
    }
    ;;
    ;;;;;;;;;;;;;;

    echo "===== "

    ;;;;;;;;;;;;;;
    ;; Completed Quests
    NumQuests:Set[${QuestJournalWindow.NumCompletedQuests}]

    if (${NumQuests} < 1)
    {
        echo "No completed quests found."
        return
    }

    echo "Your character currently has ${NumQuests} completed quests."

    QuestJournalWindow:GetCompletedQuests[Quests]
    Quests:GetIterator[It]
    if ${It:First(exists)}
    {
        do
        {
```

```
    echo "-----"
    echo "- [${Counter}] ${It.Value.Name}"
    echo "-- ID: ${It.Value.ID}"
    echo "-- Level: ${It.Value.Level}"
    echo "-- Category: ${It.Value.Category}"
    echo "-- Current Zone: ${It.Value.CurrentZone}"
    Counter:Inc
  }
  while ${It:Next(exists)}
}
;;
////////////////////////////////////
}
```
